

How to change the email address

When your photo is uploaded your email address is stored along with the photo. If a typo was made or if the wrong email address was entered you can update the email address like this:

Go to the IDStation.online website and enter your personal code. Please be aware that the codes are case sensitive. You will see your photo:

The screenshot shows the IDStation.online website interface. At the top is a green navigation bar with links: IDstation.online, Home, Watch Video, About Us, Store Locator, Help, and Privacy. The main content area is titled "This is your digital passport photo". It displays a list of metadata for the photo, including Recipient Email (@photomatic.nl), Upload Date (12-2-2019 13:31:53), Country Template (Germany Passport), ICAO test OK? (Yes), ICAO Test Result (View ISO data), Store Name (DPS office Paul), Store City (Hilversum), Personal Code (3YCPTrC), Uploaded by ID Station (DeveloplaptopPAUL), EXIF data from original photo (Click here to view EXIF data), and Digitally Altered? (No). To the right of the metadata is a "Change email?" button and a "Photo:" label above a portrait of a man with glasses. Below the photo is a "This is not me." link. At the bottom of the page are three buttons: "Delete this data", "Send digital photo by email", and "Download Photo". A "Log Out to safely close your session." link is also present.

Press the *Change email?* Button. You will get a pop-up titled *Modify Email*. Enter your email address in the text field, complete the Captcha and click *Submit*. *That's it!*
